

The main benefits of the Weatherglaze Composite Doors are :

- Traditional looking designs
- Looks like timber
- Feels like timber
- Wide range of different RAL colours
- Stable in Black
- No swelling (unlike timber doors in wet weather)
- No cracking with heat (unlike dark uPVC panels)
- No splitting and cracking

Stronger

- No dropping after installation (unlike uPVC doors)
- No callouts to toe and heel
- Warm
- **High Insulation up to 4 times more than timber and uPVC Panel Doors !!**
- Half Glazed doors have a u-value 2.0 W/m²K
- Solid doors i.e. 6 panel doors have a u-value of 1.3 W/m²K

Secure

- High impact resistance
- 4 times greater insulation than uPVC panels
- 5 point hook locks as standard
- 4 hinges as standard
- For overall structural stability this product out performs timber and uPVC doors

Low Maintenance

- Clean and wipe with car polish twice a year
- Hand paintable with ordinary external satin paint
- Change colour at any time
- They can be trimmed or repaired like a traditional wooden door
